About This Content

Stylish, classical and comfortable – and now toplights available in Train Simulator! Churchward authorised the first toplight build in 1905 and from 1907 they were built in large numbers. This set of “70ft” coaches represent the earlier toplights in GW Shirtbutton livery. The 57ft stock was used all over the GW system, while the 70ft stock (built to the extremes of the loading gauge) were used on services mainly starting from Paddington.

Key Features
